DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blouin et al. (2003/0051897).

Blouin et al. (Figure 5) discloses a coaxial cable comprising: a dielectric layer (302) formed around a center conductor (301); an outer conductor layer (304) formed around the dielectric layer; and a sheath (305) formed around the outer conductor layer, characterized in that a metal foil for providing enhanced shield effect and shape maintainability is formed between said dielectric layer and said outer conductor layer. Blouin et al. also discloses that said metal foil has a thickness of 1% to 5 % of the outer diameter of said dielectric layer ([0009], [0022] and [0028], 0.002 inches = 3% of 0.077 inches), said metal foil is

10/580,887

Art Unit: 2831

longitudinally arranged around said dielectric layer between said dielectric layer and said outer conductor layer, and said outer conductor layer is braided.

Blouin et al. discloses that the metal foil is wrapped around the dielectric layer with an overlap. It means that the width of the metal foil has to be larger than the outer diameter of the dielectric layer. Blouin et al. does not specifically disclose the width of the metal foil having a length about 1.1 to 1.9 times the outer circumference of the dielectric layer. However, it would have been obvious to one skilled in the art to choose suitable length for the width of the metal foil of Blouin et al., including 1.1 to 1.9 times the circumference of the dielectric layer, so that the metal foil can be securely wrapped around the dielectric layer since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable range involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Response to Arguments

3. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Summary

Application/Control Number:

10/580,887

Art Unit: 2831

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chau N. Nguyen whose telephone number is 571-272-1980. The examiner can normally be reached on Mon-Fri.

Application/Control Number:

10/580,887

Art Unit: 2831

If attempts to reach the examiner by telephone are unsuccessful, the

Page 5

examiner's supervisor, Diego F.F. Gutiérrez can be reached on 571-272-2800 ext

31. The fax phone number for the organization where this application or

proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR

only. For more information about the PAIR system, see http://pair-

direct.uspto.gov. Should you have questions on access to the Private PAIR system,

contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you

would like assistance from a USPTO Customer Service Representative or access to

the automated information system, call 800-786-9199 (IN USA OR CANADA) or

571-272-1000.
